compact

# TURBO-JET COMPACT

## Control the power

Cattani's Turbo-Jet Compact is an extremely robust suction system, for single surgery dentists requiring a fixed speed, reliable and cost-effective solution. Although small and light, this machine is easy to use and delivers a powerful performance.

This unit is ideal for general conservation dentistry, providing very high airflow and a vacuum power capable of lifting debris with a larger bore tip. It can be used with either dry line or wet line tip supports.

Supplied with built-in amalgam separation and pre-wired for installation, this suction system easily fits into a standard surgery cabinet. Cattani Turbo-Jet Compact comes with a two year guarantee and Cattani's vacuum pump protection.

## Designed for single surgery use

# TURBO-JET COMPACT

## Fixed speed suction and very high airflow

- 4 amp current and rated 0.42 kW
