Your RPA Training Course

dental radiation protection training

A five-hour dental radiation protection training course to cover all the elements of the GDC / BDA syllabus for verifiable CPD

A five-hour dental radiation protection training course to cover all the elements of the GDC / BDA syllabus for verifiable CPD

The course will be given by Graham Hart of YourRPA, an independent Radiation & Laser Protection Adviser and Medical Physics Expert, and will be held at the training suite of DE:UK in Clayton-le-Moors, Accrington, Lancashire.

Although you may find cheaper online training, this course has the advantage of allowing you to question any of the information you are given – indeed this is encouraged. You will leave understanding the ‘whys and wherefores’ and not just having a superficial knowledge of dental radiation protection and its legislation.

Dates: Saturdays 25th July, 5th September and 14th November

Time: 9:30 – 15:30; Fee: £85 per person

(the fee includes tea/coffee, lunch and an attendance certificate)

Dates: Wednesday 12th August, Thursday 12th November

Time: 13:00 – 18:15; Fee: £75 per person

(the fee includes tea/coffee and an attendance certificate)

The course will also cover practical topics like ‘do I need lead lining?’, what should happen when x-ray sets are installed and tested, and when you should contact your RPA.

Feedback from previous courses includes:

“First class speaker and subject explained well”

“A veritable fund of knowledge”

“Mr Hart is a great presenter”

Please note that the courses are each limited to 12 people to provide a more personal training experience.

To reserve a place, please email: YourRPA@yahoo.co.uk
